● ABOUT ME

I am a 4th-year Computer Engineering student at YILDIZ Technical University with a strong passion for software development, which has intrigued me since my childhood. Throughout my academic journey, I have actively engaged in various projects to enhance my skills in this field.

As a responsible and inquisitive individual, I embrace challenges and find satisfaction in resolving them. I possess a natural curiosity that drives me to explore innovative solutions and seek continuous self-improvement. I firmly believe in my ability to grasp new concepts rapidly, as I am confident in my aptitude for accelerated learning.

In addition to my studies, I have gained valuable practical experience as a Junior Frontend Developer, working remotely while simultaneously pursuing my degree. This opportunity has allowed me to apply theoretical knowledge to real-world scenarios and develop a solid foundation in web development. While I acknowledge that I am still in the early stages of my professional journey, I am eager to expand my expertise and reach new heights with the guidance of experienced mentors.

By combining my academic achievements, project involvements, and practical experience, I am well-equipped to contribute effectively to software development projects. I am enthusiastic about embracing challenges, acquiring new skills, and utilizing my knowledge to make a meaningful impact.

● WORK EXPERIENCE

15/10/2022 – CURRENT Remote, Türkiye

JUNIOR FRONTEND DEVELOPER REST SOFTWARE AND CONSULTANCY

1. Started as Mobile developer with Flutter.
